

2mm Impact resistant PVC edging with all edges rounded for safety

Hardwood furniture with rounded corners for safety

High Quality fittings for years of classroom use

Product Specification

Kronospan have been selected as the principle board manufacturer, providing a consistent durable surface finish with excellent machining and construction qualities.

All softwood and hardwood timbers come from sources approved as environmentally responsible.

All products are manufactured using the latest CNC technology supported by both modern and traditional skills and equipment.

All panels produced for cabinets are edged with durable 2mm Impact resistant PVC, machine applied by a hot-melt process. All edges are rounded for safety.

All fixings used in cabinet construction are of the highest contract specification.

All furniture is manufactured to the highest standards of construction and quality designed with safety in mind.

Most products are supplied fully assembled for immediate use.

This catalogue features a selection of products from our Nursery to Primary range.
